Subject: RE: Comprehensive Sampling Plan

I have reviewed the US EPA Region IV & VI (START) , EPA/ERT (SERAS), EPA/NDT/ASPECT and CTEH "Quality Assurance Sampling Plan for Mississippi Canyon Oil Spill. The plan is fundamentally sound and is in accordance with established and widely accepted QAPP's, SOP's and the collection/analytical methodology currently utilized/recognized by EPA and their contractors, NIOSH, NIST and good industrial hygiene practices. The contaminants of concern are accounted for: VOCs, SVOCs, metals, mercury, DRO/ORO, GRO, PAHs, particulates, NO2 & SO2. The spectrum of environmental media: oil, water, sediment, air both in unaffected composition, weathered and odor are all discussed. The geographical distribution as laid out is comprehensive with the receipt of complaints or sightings being covered, as well as the establishment of roving collection methods i.e. TAGA, ASPECT and the CTEH vehicles. The hold times, preservation methods, shipment methods and contract laboratories are all well laid out.

Subject: FW: Comprehensive Sampling Plan

Hey, I am getting bombarded by things. EPA IV asked for a review and informal comments on this attached sampling plan. I know you have that thing in Region VII and Region III you're working on, but can you take a look at this and cc all of us with any comments?

Rich Nickle

FYI. It is 40 + pages. Bob

Subject: Fw: Comprehensive Sampling Plan

Attached is the comprehensive plan that was completed last night. The document still says "DRAFT" but it will be finalized before R4 begins collecting data (aside from the PM data now being collected at the fixed stations)

We need to have more discussion about site-specific QAPPs but my gut feeling is that we'll have each entity (Tetra Tech, OTIE, Weston, SESD, ERT, etc.) write their own site-specific QAPP based on their activities and their labs.
